PYCO

Your Personal Fashion Companion

Purpose of PYCO

Fashion Accessibility

Aims to make fashion advice accessible to everyone

Community Building

Connects individuals looking for fashion inspiration with those who have styling expertise

Creative Platform

Serves as a stage for aspiring designers to build a portfolio and gain recognition

Long-Term Vision

Potential to evolve into a style marketplace for outfits and clothing transactions

Key Feature and Functionality

Wardrobe Cataloging

Users can organize and catalog their clothing inventory for easy access and outfit planning

Image Processing with ML Kit

Utilizes ML Kit for image background removal, enhancing user content by isolating clothing items

Style Community Interaction

Users can post photo, seek feedback, and receive outfit suggestions from the community

Fashion API Integration

Leverages API to fetch data like brand info and outfit ideas, keeping users updates on fashion trends

Technical Architecture and Offline Capabilities

Single Activity Architecture

Ensures streamlined navigation with a single-activity structure and composables for different screens.

Network Requests with Retrofit

Uses Retrofit for API requests, supporting coroutines for asynchronous, non-blocking data retrieval.

Offline Data Storage

- Room Database: Allows users to access their wardrobe inventory offline
- WorkManager: Syncs data with Firebase Firestore when internet connection is restored, providing a seamless offline experience

Target Audience

Fashion Seekers

People looking for fashion advice, help with outfit coordination or ways to improve their style

Your Adults & Students

Students, young professionals, and others who may need affordable fashion advice for events, interview, or daily wear

Aspiring Designers

those with a knack for styling who want to showcase their talent, build a following, and receive community feedback

Fashion Enthusiasts

People who enjoy exploring unique outfit ideas and keeping up with trends
